CORIUS Group adds new locations in Northern Bavaria to its network

MVZ Dermatologie Nürnberg and MVZ Dermatologie Bad Windsheim joined the group on 1 July

Munich/Nuremberg/Bad Windsheim. The CORIUS Group is pleased to announce the integration of the regional group practice (ÜBAG) for MVZ Dermatologie Nürnberg and MVZ Dermatologie Bad Windsheim into its portfolio. The addition of the new practice, formerly known as Dr Kramer and Colleagues Dermatology • Laser • Aesthetics, on the 1 July strengthens the CORIUS Group's healthcare offering in northern Bavaria by offering patients in the region a wide range of dermatological services at two locations.

Dr Kirsten Kramer took over her first dermatological practice in 1997. Under her leadership, the practice grew steadily over the years to become one of the leading dermatological facilities in Nuremberg and the surrounding region. In 2021, Dr Kramer eventually opened a second location in Bad Windsheim.

MVZ Dermatologie Nürnberg and MVZ Dermatologie Bad Windsheim offer patients a comprehensive range of medical-dermatological and aesthetic-dermatological services. The main treatment areas include skin cancer diagnosis and treatment, laser therapy and filler and botulinum toxin treatments. The practice employs a total of 27 people, including Dr Kramer, two other full-time specialists and two trainees.

Dr Kirsten Kramer: "With CORIUS as a strong partner at our side, we are confident that we can face the impending challenges in our healthcare system and continue to provide the highest quality of medical and aesthetic dermatological care to our patients."

About the CORIUS Group

The CORIUS Group is a network of dermatology and phlebology practices and clinics in Germany, the Netherlands and Switzerland. The group's main goal is to design the future of medicine and guarantee comprehensive care. Personalised successor models, attractive career opportunities and a significantly lighter administrative burden for medical staff make the CORIUS Group a strong, dependable partner. The common goal: to design the future of dermatology.
